

A-KABEL

Modular Class 1 Bluetooth Dongle

A-KABEL's Modular Bluetooth Dongles allow hands-free, full duplex communication between dongles and or Bluetooth headsets up to 200 metres apart. The dongle has a quick disconnect connection that allows numerous types of headsets to be connected to suit the type of application required. Manufactured in Norway in close collaboration with end-users, using the latest technology to ensure excellent hands-free DUPLEX communication in many different environments.

Versatile headset portfolio allow dongle to be used with many types of headset

Waterproof Quick Disconnect modular connection

- Bluetooth dongles work in pairs
- Class I Bluetooth enables up to 200 metres working distance between headsets
- Encrypted full duplex communication between dongles/headsets
- Dongles can be paired to the AK6591/6592 heavy duty headsets
- Pairs of headsets will not interfere with other headsets working in the same area
- Total hands-free communication allows full mobility for the user
- Many different styles of headset can quickly be connected to the dongle
- Flashing LED indicates dongles are in operation
- Can be fitted with re-chargeable batteries which can be charged without having to remove from the dongle with approx 20 hours user time (4 hours charge time)
- Can also be powered by 2 x AA batteries
- Flexible modular headset range allows use even when wearing fireman's or other protective helmets
- Waterproof connection between headset & Dongle
- Can be used with throat microphone allowing use whilst wearing Breathing Apparatus & Masks
- Rugged, durable design
